This project is abandoned.

Whether this project is out of date or its author marked it as abandoned, this project is no longer maintained.

If you wish to take this project over, please [report it](#) and state your intentions.

This is my very first plugin, CoffeeBashX

What it does

It will give you a potion called Coffee, and when you drink it you will get extreme nausea for 30 seconds, along with strength and speed. I plan to make a delay for each coffee purchase, and take money from players when they buy it. They can also craft it using Cocoa, a bottle, and Sugar! This plugin is used for PVP purposes and can go great with factions. It really is neat and I really think you'll all enjoy it when it becomes released. Hopefully, this plugin will be 100% done by the the middle of December or maybe even earlier!

The Commands

/cbx buy (Buy a bottle of coffee for custom \$ amount set in the config.yml)

/cbx help (Commands from CBX)

The Permission Nodes

cbx.buy

cbx.help.display

REQUIRED DEPENDENCIES

-Vault (Obviously, what else would you use for money?)

I have decided to stop updating this plugin. It has outlived its usefulness. If you wish to take it over please contact me but I am not marking it as abandoned just yet.
